

Notes, In Three Parts (Mvo-p Psych, 2020 April 27)

By Kevin A. Sensenig

Draft 1.02

2020 April 27

Notes, in 3 parts:

Item

Markers and meaning – understanding, thought, speech, action, behavior markers; mental states, emotive states, intentional states, physical states; descriptions, the noumenal, the phenomenal, and the interconnected; dependent arising (pratityasamutpada); standpoint or view.

in 1. The DSM

in 2. A practical view

Are these synthesized well and adeptly, with complete descriptions and multiple angles? Are these considered in totality?

Do they yield to a structure-function, uniframe model?

Item

Are there thoughts, concepts, and perceptions that are detrimental for a person? One might want to take up the philosophical, spiritual, religious, and psychological – and these would supersede the biogenetic view. One might also consider these in the context of neuroscience (see my own notes (cognitive maps, social maps, learning, training, decision structures, mental structures, recognition, and the spatial-temporal), and the work of Caroline Leaf). One might consider the work of Marvin Minsky and his ideas on the functioning of the mind and our Ways To Think; and the Zen space, which is vast.

One would set meds – meds-as-the-medicinal – in this context and use them selectively and with dialogue and the participant; and being fully aware of what they do on these multiple levels, noting both positives and detriments of any meds.

Item

The 3-space of thought, speech, and action. The 3-space of the world-space.

The spatial-temporal of understanding, perception, and reason.

Endnote

For structure-function and the uniframe model see *The Society Of Mind* by Marvin Minsky.

Notes, In Three Parts (2020 April 27)

Page 1 of 2

Caroline Leaf is a neuroscientist with practical ideas on how to integrate spirituality and religion, our thinking, diet, and neuroscience. She has written several books such as *Who Switched Off My Brain* and *Think And Eat Yourself Smart*. (I have yet to study her material much.)

See my [Mvo-p – Various Resources That Have Been Key For Kevin A. Sensenig](#) for my own study, practice, and resource material, including Zen. I feel that resource in this way, and in this world, is key, for an individual (and psych team). This can lead to deep apperception and a participant and all-functions ever-present-moment unfolding state.
