

An Inquiry On IF A Description Of Neuroscience (In The Mental Health Context)

Kevin A. Sensenig Draft 1.04-L 2025 November 12 – 2026 January 23

IF a description of the neuroscience on the individual (a theoretical/observational approach) is partly and substantively and involves ...

- ___ decision trees
- ___ moments of action (mental action, verbal action, physical action)
- ___ social arrangements and maps
- ___ spatial arrangements and maps
- ___ spatial-temporal apperception, understanding, and function
- ___ knowledge structure and representation
- ___ memory and the experiential
- ___ perception(s) and the environment

Also, microbiology, structures, arrangements, mutability level, memory, perceptions, action, function, aspects ... and the careful observation of what is there and present or not ... (the art of science)

THEN in mental health, where is the professional to connect on these? It may be the dimension ideal psychiatry plus, and psychology, and social work psychosocial and environmental facts and inquiry...

AT a psych unit and WeSH...

INVOLVE THESE AND AN OBJECT of study, each aspect of the individual's ontological, epistemological, total, and "neuroscience -- these questions with the individual" space.

AT PRESENT IT IS, IN PART, it is there during groups IF but not with this in mind, to develop a view and map

AND NOT (YET) one on one, explicitly, with the individual on his or her specific and particular being-nature and circumstance, in these terms AS A PART OF inquiry.

FOR SOME a key FOR SOME an evidence FOR SOME an inquiry

ONE SUGGESTION as excellent psychology and social work logic, basis, and language and technique, lived in the present-moment with the individual and his or her initiative ... the KAS document "A Multifaceted Space: Aspects To Treatment In Social Work And Psychology" and other documents in that portfolio set; available at Mvo-p | MVO: 2019 Thesis (<https://www.mvo-p.com/Mvo-2019-Thesis.html>) ... Mvo-P Psych Unit Experiential Advocacy 2024-2025 And Transformative Justice.
